WARNING

DECLASSIFICATION REVIEW BY NIMA / DoD

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

SHUANG-CHENG-TZU MISSILE TEST CENTER, CHINA

25X1D

25X1B

25X1D This photographic interpretation report
25X1D is prepared in response to requirement
NSA/PO432/R69-64 and presents an analysis
of the Shuang-cheng-tzu Missile Test Center
(SCTMTC) on KEYHOLE [REDACTED]

25X1D These missions provided partial photo-
25X1D graphic coverage of the Shuang-cheng-tzu
Missile Test Center (Figure 1) on three different
dates-- [REDACTED]

25X1D Activity could be noted on pad A1, SSM
Launch Area A (Figure 2), on [REDACTED].
A detailed readout of this activity is limited by
small scale of the photography. At least six
vehicles/pieces of equipment are visible on the
pad, in addition to a large dark object or objects
in the center of the pad. The arrangement of
vehicles/pieces of equipment on the pad is very
similar to that during the possible exercise
observed on the same pad in [REDACTED]

25X1D In addition, tents are visible
25X1D adjacent to the SSM Housing and Support Area
(Figure 3), as they were in [REDACTED].
25X1D None were visible on coverage of [REDACTED].
25X1D Vehicles/pieces of equipment were visible on the
25X1D possible balloon launch platform in Meteorolo-
25X1D gical Station No 1, adjacent to the SSM Housing
and Support Area, on both [REDACTED] and
[REDACTED]

Some changes can be noted in the SAM
Launch Facilities (Figure 4). Probable guidance
radars are visible in the central guidance
revetments in both launch sites. Two additional

launch points are revetted in SAM Launch Site
B, making a total of three launch points that
are revetted. Unidentified pieces of equipment
are visible in the revetted hold area just west
of Launch Site A.

A new 140- by 45-foot two-story barracks
building has been added to the SAM Housing
and Support Area since [REDACTED]

The SSM-SAM Assembly and Checkout Com-
plex (Figure 5) had activity present on [REDACTED]
[REDACTED] with railroad cars visible extending from
the large drive-through buildings in the SSM
Assembly and Checkout Area.

The SAM portion of the SSM-SAM Assembly
and Checkout Complex continues to be the only
[REDACTED]

25X1D Construction activity is continuing in the
Main Support Base (Figure 6), with at least ten
new buildings since [REDACTED]. Five new
buildings, measuring 155 by 25 feet, probably
still under construction, have been added south
of the Thermal Electric Power Plant.

Early Warning Radar Site No 1 (Figure 7),
located approximately 4 nautical miles south-
east of the Main Support Base, shows no appar-
ent change in facilities. An unidentified type
of radar is positioned on the radar mound.
